PROFESSIONAL EXPERIENCE

.NET Developer - SmartB, Zamora de Hidalgo 12/2020 – 08/2022

- Developed a GRP system under the supervision of the software development manager, which enabled efficient management of water, sewage, and sanitation tax collection in the municipality of Tingüindin, Michoacán starting from the year 2021.
- Actively supported more than 15 ERP systems across different industries in collaboration with the implementation team, establishing new standards of quality and ensuring customer satisfaction in every project.

Participant in the "Jóvenes Construyendo el Futuro" Program - SmartB, Zamora de Hidalgo 11/2019 - 12/2020

- Collaborated in the development of work methodology and standards for the company's offered systems as part of the implementation team.
- Fostered a culture of teamwork and continuous improvement through effective communication with colleagues from different areas, resulting in improved information flow within the company.
- Made significant contributions to customer information security and the implementation of vulnerable procedures, generating greater trust in customer relationships.
- Contributed suggestions for improvement and made corrections that enhanced functionality and aligned processes with customer needs in every project. This was based on my understanding of the flow of work and the functioning of the company's system.
- Strengthened communication skills, which improved relationships with team members and customers.
- Participated in the development of new projects, providing insights and suggestions for effective and efficient project execution, while also enhancing my understanding of information flow within the company's structure.
