PROFESSIONAL EXPERIENCE

.NET Developer - SmartB, Zamora de Hidalgo   *12/2020 – 08/2022*

- Developed a GRP system under the supervision of the software development manager, which enabled efficient management of water, sewage, and sanitation tax collection in the municipality of Tingüindin, Michoacán starting from the year 2021.
- Actively supported more than 15 ERP systems across different industries in collaboration with the implementation team, establishing new standards of quality and ensuring customer satisfaction in every project.

Participant in the "Jóvenes Construyendo el Futuro" Program - SmartB, Zamora de Hidalgo   *11/2019 - 12/2020*

- Collaborated in the development of work methodology and standards for the company's offered systems as part of the implementation team.
- Fostered a culture of teamwork and continuous improvement through effective communication with colleagues from different areas, resulting in improved information flow within the company.
- Made significant contributions to customer information security and the implementation of vulnerable procedures, generating greater trust in customer relationships.
- Contributed suggestions for improvement and corrections that strengthened functionality and aligned processes with customer needs in every project, based on learning the flow of work and the company's system functioning.
- Strengthened communication skills, which improved relationships with team members and customers.
- Participated in the structure of new projects, providing vision and suggestions for effective and efficient project focus, as well as strengthening knowledge about information flow in the company's structure.
